Portable Executable Product  
Version: 1.0 Product Name:  
OSM2SHP Date Published:  
2017-06-19 OSM2SHP is a  
software application that  
provides users with a simple  
means of transforming their

---

OSM files to a SHP, SHX or DBF format. The conveniences of a portable app The installation process is not a prerequisite, as this product is portable. This means that, unlike installers, it is not going to add new items to the Windows registry and hard drive without your approval, and it is not going to leave any kind of traces behind after its removal. Another noteworthy aspect is that you can easily copy the program files to a USB thumb drive and thus take OSM2SHP everywhere with you can run it on the fly,

---

on any PC you come in contact with. Method of use and available options This utility only lets you upload an OpenStreetMap with the help of a file browser, as the “drag and drop” function is not supported, and neither is batch processing. Once you add an item, you can view the number of nodes and ways in the file.

In addition to that, you can easily choose to convert points, lines and polygons through some checkboxes. It is possible to save output files to a custom location on the hard drive, using an SHP, SHX or DBF

---

extension. No other notable options are supported.

Conclusion and performance

The amount of resources required is low at all times and thus, the system's performance is not going to be burdened in any way. The interface you come by presents a user-friendly environment, the response time is good and in our tests we did not register any errors, crashes or freezes.

All in all, OSM2SHP is a pretty simple, yet powerful piece of software. Nonetheless

Use the 'Key Macro' to activate the macro key of the program. Input keys: Key: Alt  
Shortcut: A, Shift Settings: Any key press will trigger the script. This key script can be used in all applications by using this software. Key: Ctrl  
Shortcut: Win Settings: The keys `Ctrl` and `Alt` will be bound to the `Enable` and `Disable` options in the `Modules` section. Modules: All modules are enabled by default. Module 1: Module 1 lets you use the `Endroct Command` which lets you

---

execute a script when you exit the application. Module 2: Module 2 lets you use the `Wendraw` key, this script executes every time the program is started. Module 3: Module 3 lets you use the `F2` key, which opens the selected file in a separate window. Module 4: Module 4 lets you use the `Dllhost` key, this script opens the address bar. Module 5: Module 5 lets you use the `F10` key, which closes all the windows. Module 6: Module 6 lets you use the `Esc` key, which cancels the current file. Module 7: Module 7 lets

---

you use the `F11` key, which opens the file browser. Module 8: Module 8 lets you use the `F12` key, which opens the hard disk location window. Module 9: Module 9 lets you use the `F13` key, which opens the Start menu. Module 10: Module 10 lets you use the `F14` key, which opens the Control Panel. Module 11: Module 11 lets you use the `F15` key, which opens the Windows CharMap. Module 12: Module 12 lets you use the `F16` key, which opens the user account. Module 13: Module 13 lets you use the

---

`F17` key, which shows the font menu. Module 14: Module 14 lets you use the `F18` key, which shows the windows menu. Module 15: Module 15 lets you use the `F19` key, which shows the Info panel. Module 16: Module 16 lets you use the `F20` key, which shows the Control Panel again. Module 17: Module 17 lets you use the `F21` key, which shows the font menu. Module 18: Module 1d6a3396d6

---

any errors, crashes or freezes.

All in all, OSM2SHP is a pretty simple, yet powerful piece of software.

Nonetheless, it is in dire need of an update. A little-known map file format has been released, allowing people to add their own maps to the OSM database. While it is possible to add, edit and view your own OSM data with the Editor, Google Maps and Google Earth apps, it was only possible to store one's data in the.osm format – the OpenStreetMap format. This isn't the case anymore.

---

OSM2Map is a relatively new “master file” format that allows users to upload their own OSM data, from one location to another. Using the tool, they can create maps of their own, with or without data from the OSM. OSM2Map has launched
